July 18, 2005

Docket No. 050-15-1 Regulatory Analysis & Development.

I am opposed to mandatory Animal Identification. In our religion we believe in a plain and simple Lifestyle. We do not have radios, television, electricity and etc. We also do not have computers and believe computer technology encroaches on our lifestyle. I also believe this is going way overboard. I wonder how many people in this country have been seriously affected healthwise by animal disease? What kind of ratio in the population? Horses are not supposed to

be in the food chain so where
do they figure in? I think
this program is too intrusive in
our lives. In this country we
are losing our freedom very fast
in the last few years.

Sincerely

Delbert S Byler
